Lavandulol

90%

Lavandulol is a monoterpene alcohol found in a variety of essential oils such as lavender oil. The term refers to either of two enantiomers. The (R)-enantiomer is natural and has an aroma described as "weak floral, herbal odor with slightly lemon-like, fresh citrus fruity nuance"; the (S)-enantiomer has only a weak odor. It is widely used in flavor and perfume industry.

Substance Identification

Synonyms	(-)-Lavandulol (R)-Lavandulol
CAS	N/A
EINECS	261-264-2

FEMA	N/A
HS.CODE	N/A
Molecular Formula	C10H18O
Molecular Weight	154.25

Application & Uses

- used in the perfume industry
- used as a fragrance of lavender oil
- used as insect pheromones
- used as food additive
- used as pharmaceutical intermediate
- used in the production of polyolefin plastic

Sales Specification

ITEM	VALUE
Appearance	Colorless to pale yellow clear liquid
Odor	Floral
Purity, %	90 min

Package

GHS Hazard Statements

H-Code	no data available
P-Code	no data available
Response	no data available
Storage	no data available
Disposal	no data available
S-phrases: S23-24/25	

Storage

- flammable materials should be stored in a separate safety storage cabinet or room
- ground all equipment containing material
- keep away from heat
- keep away from sources of ignition
- keep container tightly closed
- keep in a cool, well-ventilated place

Remark

The above information is believed to be accurate and presents the best explanation currently available to us. We assume no liability resulting from above content. The technical standards are formulated and revised by customers' requirement and us, if there are any changes, the latest specification will be executed and confirmed in the contract.
