alpha Longipinene

95%

alpha-Longipinene is derived from Gum turpentine oil and is a valuable compound in various industrial applications. This monoterpene is primarily used as a solvent, facilitating the dissolution and processing of various substances. It also serves as an intermediate in the production of dyestuffs, contributing to the synthesis of vibrant and durable colors. Additionally, alpha-Longipinene plays a role in the creation of perfumes, where it enhances fragrance formulations, and in medicine production, where it is utilized for its potential therapeutic properties.

Substance Identification

Synonyms	α-LONGIPINENE
CAS	N/A
EINECS	

FEMA	N/A
HS.CODE	
Molecular Formula	C15H24
Moleclar Weight	204.35

Application & Uses

- used as solvent, intermediate to dyestuff, perfume, medicine production

Sales Specification

ITEM	VALUE
Appearance	Colorless clear liquid
Content, %	95 min

Package

- Packing in galvanized iron drum of about 175kg net each, 80drums/14000kg or per 20'ft container.

GHS Hazard Statements

H-Code	H227
P-Code	P210/280
Response	P370+P378
Storage	P403+P235
Disposal	P501

Storage

- keep separated from incompatible substances
- store and handle in accordance with all current regulations and standards
- store in a cool, dry place
- store in a tightly closed container

Relation Products

- [Gum Turpentine](#)

Remark

The above information is believed to be accurate and presents the best explanation currently available to us. We assume no liability resulting from above

content. The technical standards are formulated and revised by customers' requirement and us, if there are any changes, the latest specification will be executed and confirmed in the contract.
