Madecassic Acid

85%

Madecassic acid is a naturally occurring pentacyclic triterpenoid that is found mainly in the traditional medicinal herb *Centella asiatica*, also known as gotu kola. Research has found that madecassic acid can assist wound healing by stimulating collagen production. Madecassic acid can be used in anti-aging skin care formular.

Substance Identification

Synonyms	Brahmic acid
CAS	N/A
EINECS	606-031-1

FEMA	N/A
HS.CODE	N/A
Molecular Formula	C30H48O6
Molecular Weight	504.7

Application & Uses

- Medicinal ingredients, healing wounds
- Formula for anti-aging beauty products

Features & Benefits

- Madecassic acid can assist wound healing by stimulating collagen production. Collagen gives our skin strength and durability. In addition to assisting wound healing, increased collagen levels can help to reduce signs of aging, such as fine lines and wrinkles.

Package

GHS Hazard Statements

H-Code	no data available
P-Code	no data available
Response	no data available
Storage	no data available
Disposal	no data available

Storage

- flammable materials should be stored in a separate safety storage cabinet or room
- ground all equipment containing material
- keep away from heat
- keep away from sources of ignition
- keep container tightly closed
- keep in a cool, well-ventilated place
