Madecassoside

95%

Madecassoside, also classed as a triterpenine, stimulates production of type III collagen. In studies, madecassoside has demonstrated skin healing as well as anti-aging properties in skin. Madecassoside has demonstrated some benefit in the treatment of psoriasis, most likely due to its anti-inflammatory properties.

Substance Identification

| | |
|----------|---------------------------|
| Synonyms | Asiaticoside A Redermic |
| CAS | N/A |
| EINECS | 252-076-1 |
| FEMA | N/A |

HS.CODE

Molecular Formula

C48H78O20

Molecular Weight

975.1209

Application & Uses

- Inflammation control
- Natural ingredients of skin care products, used for stimulating the synthesis of collagen I et III
- Used for the treatment of psoriasis

Features & Benefits

- Inflammation control
- Stimulating the synthesis of collagen I et III, integral components of the skin
- Reducing the activity of MMPs - matrix metallo proteins - or enzymes that play a role in the breakdown of the skin's matrix or framework
- Has demonstrated some benefit in the treatment of psoriasis, most likely due to its anti-inflammatory properties

Package

GHS Hazard Statements

No GHS data available

Storage

- flammable materials should be stored in a separate safety storage cabinet or room
- ground all equipment containing material
- keep away from heat
- keep away from sources of ignition
- keep container tightly closed
- keep in a cool, well-ventilated place

Relation Products

- [Asiatic Acid](#)
- [Madecassic Acid](#)
- [Asiaticoside](#)
