Ocimene

72%

Ocimenes are a group of isomeric hydrocarbons, the isomer of Myrcene. It includes α -Ocimene, cis- β Ocimene, and trans- β Ocimene. Ocimene is naturally found in many essential oils, such as basil oil, lavender oil, and clary sage oil, etc. Ocimene is industrially prepared by pyrolysis of alpha-Pinene under high temperatures. It appears colorless liquid with floral and green odor and is widely used in fragrance formulation.
