Wood Based Activated Carbon (Amino Acid Uses)

WAA

WAA is a type of wood based activated carbon that produced by phosphoric acid activation process. It is specialty used for amino acid adsorption in water treatment, food industry and treatment process.

Substance Identification

Synonyms	Activated Charcoal
CAS	N/A
EINECS	231-153-3
FEMA	N/A

HS.CODE	380210
Molecular Formula	C
Moleclar Weight	12.01

Application & Uses

- Amino acid adsorption in water treatment
- Amino acid adsorption in food industry
- Adsorption for treatment process

Sales Specification

ITEM	VALUE
Adsorption of Methylene Blue, ml/0.1g	14 to 16 min
Adsorption of Glutamic Acid, %	85 to 95 min
LOD Value, %	10 max
PH Value	4 to 7
Content of Ash, %	5 max
Content of Iron, %	0.05 max

ITEM	VALUE
Content of Chlorine, %	0.08 max
Content of Ca & Mg, by MgO, %	0.25 max

Package

- Plastic bag with inner film, 20kg net each

GHS Hazard Statements

There is currently no available data for this product, click to view [GHS Classification and Labelling by UNECE](#).

Storage

- Keep away from heat, sparks and open flame. Guard against dust accumulation of this material
- Keep containers closed when not in use. Store at ambient temperature and atmospheric pressure
- Keep container tightly closed. Keep out of the reach of children
