## Gum Rosin

YPR/WW

Rosin, also called colophony or Greek pitch, is a solid form of resin obtained from pines and some other plants, mostly from conifers. It is produced by heating fresh liquid resin to vaporize the volatile liquid terpene components. It is semi-transparent and varies in color from yellow to black. At room temperature rosin is brittle, but it melts at stove-top temperatures. It chiefly consists of different resin acids, especially abietic acid. Chinese Gum Rosin product is used for the manufacturing of paper, paint, soap and printing ink. Since rosin is easily softened and oxidized, in the oil paint industry, the carboxylation reaction of resin acid is usually employed to produce resinates for further use. While in the producing of synthetic rubber and printing ink, resin acid is changed into disproportionate rosin, polymerized rosin, hydrogenated rosin, etc for further use by its double bond reaction.

## Substance Identification

Synonyms

Colophony

CAS

N/A

EINECS	232-475-7
FEMA	N/A
HS.CODE	380610
Molecular Formula	C19H29COOH
Molecular Weight	262.4302

## Application & Uses

- used as a binder component of adhesive, includes rubber based adhesive, synthetic resin based adhesive and plant base adhesives
- used for paper sizing, improving the strength and smoothness, increasing wear resistance,
- used for thermoplastic coating, such like road marking
- used as vehicle body and enhancing the adhesion in ink industry
- as film forming material for controlled-release fertilisers

## Sales Specification

ITEM	VALUE
Colour	Light Yellow
Softening Point, R&B, °C	76 min
Acid Value, mgKOH/g	166 min

ITEM	VALUE
Ash, %	0.03 max
Insoluble in alcohol, %	0.03 max
Unsaponifiable matter, %	5 max

## Similar Specs

- Gum Rosin
- Gum Rosin

## Package

- Iron Drum, 225kg net each
- Paper Bag, 25kg net each

## GHS Hazard Statements

No data available

## Storage

- avoid contact with light
- keep separated from incompatible substances
- store and handle in accordance with all current regulations and standards
- store in a cool, dry place
- store in a tightly closed container
