## Terpene Phenolic Resin

TPR145, TP95

Terpene Phenolic Resin (TPR) with high softening point and good stickability, particularly suitable to be used in making chloronorgutta rubber (graft polychloroprene rubber) adhesive for PVC artificial leathers. When once used, they can keep effective for much longer time as solvent adhesive because of their good quality of heat-resistance and better solvency for various kinds of flexible matter and resins. TPR are also widely used in all kinds of solvent adhesive, dismodule type of CR adhesive, heat solvent adhesive, heat solvent adhesive stick & adhesive tape, and sole adhesive of high grade shoes.

## Substance Identification

Synonyms

CAS

N/A

EINECS

N/A

FEMA	N/A
HS.CODE	391110
Molecular Formula	C16H22O
Molecular Weight	230.3453

---

## Application & Uses

- used in hot-melt adhesive, pressure-sensitive adhesive, coatings, print inks, printing electronic circuit, plastic modification, rubber product

## Features & Benefits

- high softening point
- good compatibility with many other resins
- higher heat resistance
- good adhesive for acrylic resin, natural rubber and synthetic rubber

## Sales Specification

ITEM	VALUE	TEST METHOD & UNIT
Appearance	Irregular-shaped solid cakes with yellow to light yellow colors	
Acid Value	20 to 30	mgKOH/g
Colour	7 max	@Gardner
Softening Point	140 to 160	@R&B, °C

ITEM	VALUE	TEST METHOD & UNIT
Appearance	Irregular-shaped solid cakes with yellow to light yellow colors	
Acid Value	1.0	mgKOH/g
Colour	7 max	@Gardner
Softening Point	92 to 98	@R&B, °C

## Package

- Paper Bag, 25kg net each, 12 months shelf life

# GHS Hazard Statements

No GHS data available

## Storage

- guard against dust accumulation of this material
- keep away from heat, sparks and open flame
- keep containers closed when not in use
