Lac Dye

Lac Dye, also known as Alta, is a bright red dye. It is very lightfast and resistant to temperature which melts at 180° C and decomposes at approx. 230° C. Lac Dye is mainly applied by dyeing of textiles, such as dyeing wool and silk fabric, silk, cotton, wool. And it may also be used for oil painting, shellac varnishes, water colour painting and cosmetics.

Substance Identification

Synonyms	Laccaic Acid NATURAL RED 25
CAS	N/A
EINECS	918-731-7
FEMA	N/A

HS.CODE	380993
Molecular Formula	C60H90O5/C91H62N2O44
Molecular Weight	1887.45298

Application & Uses

- Used as natural food additives for colorant
- Used as a red colorant in cosmetic field and pharmaceuticals
- Used as a senior dye in the textile manufacturing industry
- Used for oil and watercolor painting

Features & Benefits

- Low ash, impurity, heavy metal, solvent residue and no pesticide residue.
- Water and ethanol as solvents ensure the safety of the product.

Sales Specification

ITEM	VALUE
Colour	Natural Red 25 (75450)

ITEM	VALUE
Decomposing Point, °C	230
Melting Point, °C	180
Softening Point, °C	144
Solubility	soluble in water

Package

- Iron Drum, 10kg net each, plastic bags inside available
- Packaging can be made to orders

GHS Hazard Statements

There is currently no available data for this product, click to view [GHS Classification and Labelling by UNECE](#).

Storage

- avoid contact with light
- keep separated from incompatible substances

- store and handle in accordance with all current regulations and standards
- store in a cool, dry place
- store in a tightly closed container
