Beta Pinene

98%

Beta-Pinene and alpha-Pinene are found naturally in the Turpentine oil of pine trees. According to the different species of pinus, there is a difference in the contents of beta-Pinene. beta-Pinene appears light yellow liquid with a pine-like woody odor. It is industrially separated from turpentine oil on the rectification tower. The refined beta-Pinene is the original ingredient of fragrance raw materials. It can also be used in daily chemicals formulation. The application of hot tearing to Myrcene is used as synthetic raw materials of Linalool, Geraniol, Nerol, [Myrac aldehyde](#), Lyrar, Ambergris and other flavors. Refined beta-Pinene can be used as the flavor of daily chemicals, and control the contents less than 2%.
